

S.T.A.L.K.E.R. Lists v0.2

Here's some useful reference info for you - a weapon list and an armor list.
This is the kind of information which should be in the gamers reference handbooks - I bought mine (in german) from PRIMA Games (GSC Game World), and it stinks, containing hardly any useful info at all...
You can download it in [PDF Format](#) here - much better for printing.

As I get more info, I'll add it here :-)
Currently, I haven't been able to find all the information - where, for example, is the information about the improved weapons? Also, I can't find three of the shotguns...
As soon as I've got this, I'll add three more values: accuracy, recoil and weapon quality.
I'd very much appreciate any feedback or additional data:
KlausBreuer@GMail.com
If you can't see my email above (had to disguise it for the cursed spammers), either enable Java, or check the page source.

Weapon List

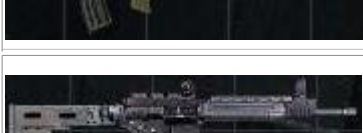

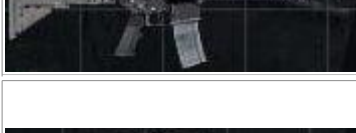

An overview of the weapons available in the game S.T.A.L.K.E.R.

I'm currently adding quite a bit of info from the [Stalker FAQ](#) and diverse forums.
As soon as I have more data available, I will update these numbers, possibly adding more info like rate of decay, magazine size, and so on.

View	Game name	Real name	Type	Accuracy	Damage	Rate of fire	Handling	Ammo	Mag Size	Range	Hit Power	Weight	Cost	Comments
	Knife	Knife	Knife	-	24	12.5	24	-	-	1.4	1.8	(none)	(none)	Only in the arena can you see it in your inventory, but you always have it. Sneak up to people and use it to save ammo.
	Fort 12	Fort 12	Pistol	3.9	1.8	3.9	23.9	9x18mm	12	50	0.31	0.95 kg	700 RU	A pistol produced for the Ukrainian police force, which replaced the PM. Improved accuracy, ergonomics, and a larger magazine, but is less reliable.
	Fort 15	Fort 14	Pistol	3.9	1.8	3.9	23.9	9x18mm	?	?	?	0.98 kg	700 RU	An experimental prototype of the Fort 12 pistol, designed to be its successor.
	PMm	Makarov PM	Pistol	2.5	1.2	3.7	23.8	9x18mm	8	50	0.3	0.81 kg	560 RU	The most widespread pistol in the Zone; a legacy of the Soviet era. Relatively reliable and cheap, it has a low magazine capacity, low power, and mediocre accuracy. The main weapon of a rookie Stalker.
	Noiseless Pistol (PB1s)	PB 6P9 (Silenced)	Pistol	3.1	1.1	3.9	22	9x18mm	8	50	0.3	1.05 kg	600 RU	A pistol with an integrated silencer and used by the Soviet special forces. An outdated weapon, but is still very effective in skillful hands.
	Martha	Beretta 92FS	Pistol	2.9	7.5	3.5	23	9x19mm	15	1,000	0.52	1.18 kg	1,800 RU	Adopted by the American army and police, as well as many military and police units all over the world. It is especially popular among criminals for its high-powered rounds and high-capacity magazine.
	Walker P9m	Walther P99	Pistol	4	1.8	4	24	9x19mm	16	50	0.31	0.88 kg	1,600 RU	An excellent pistol. A highly accurate and reliable gun with a high capacity magazine.

	HPS1-1M	FN HP-SA	Pistol	2.5	11.9	3.8	23	9x19 mm	13	1,000	0.7	1.04 kg	1,000 RU	Considered as one of the best pistols in the 20th century. Reliable, powerful, and good accuracy. Magazine can hold 13 rounds.
	Kora 919	Colt M1911	Pistol	2.5	2.7	3.9	22	.45 ACP	7	50	0.35	1.21 kg	2,200 RU	A great, reliable pistol. Uses a small-size magazine which is balanced by the use of high-powered rounds.
	Noiseless Kora	Colt M1911 (Silenced)	Pistol	2.5	2.7	3.9	22	.45 ACP	?	?	?	1.21 kg	2,200 RU	A silenced variant of the Colt M1911 pistol - the weapon of choice by hired assassins. Fitted with a non-removable silencer. Belongs to a soldier named Bullet.
	SIP-t M200	SIG Sauer P220	Pistol	4.8	4	3.8	23.1	.45 ACP	7	50	0.4	0.83 kg	2,400 RU	A pistol developed in 1975, yet it is still popular around the world. Has a low capacity magazine, but is extremely reliable and used the high-powered .45 ACP round.
	UDP Compact	H&K USP Compact	Pistol	3.9	4.9	4.1	23.9	.45 ACP	8	50	0.42	0.84 kg	2,000 RU	A very reliable pistol. A high-quality, compact, close-range weapon, it is very popular among the Zone veterans.
	Black Kite	IMI Desert Eagle	Pistol	0	7	3.2	13.5	.45 ACP	8	100	0.5	1.82 kg	5,000 RU	Big, heavy, loud, and very destructive. Not very popular in the Zone due to its price and size. Besides, there aren't any elephants to hunt down around here!
	Big Ben	Big Boy	Pistol	0	10.9	3.2	13.5	9x39mm	?	?	?	1.89 kg	5,000 RU	A variant of the Desert Eagle, modified to use rifle rounds. A devastating killing machine in Close Quarters Combat. Can be found in a metal box in the same underground area as the Family Rifle.
	Sawn-off Shotgun	Sawed-off Shotgun	Shotgun	3.2	13	7	19.7	12x70, 12x76	?	?	?	1.99 kg	800 RU	A double-barreled shotgun with shortened barrels. Lighter and more compact, but is only effective at close range. A weapon most commonly used by rookies.
	Chaser 13	Winchester M1300	Shotgun	3.8	15.5	1.8	6.8	12x70, 12x76	6	50	0.83	3.27 kg	4,300 RU	A very reliable, smooth-bore, pump-action shotgun made for use in hostile environments.
	Combat Chaser	Winchester M1300 (Combat) ?	Shotgun	3.8	17.5	1.8	6.8	12x70, 12x76	?	?	?	3.22 kg	4,300 RU	Variation of the Chaser. A small fragment of the artifact "Gravi" was built into the barrell, positioned in such a way as to increase the speed of the bullets flight.
	TOS34	TOZ-34	Shotgun	6	24	7	0	12x70, 12x76	2	1,000	1.5	3.19 kg	1,000 RU	This hunting shotgun is popular, but there's nothing noteworthy about it.
	SPSA14	SPAS-12	Shotgun	0.8	14.5	2.5	2.1	12x70, 12x76	8	50	0.8	4.76 kg	4,000 RU	The SPAS-12 is a smooth-bore shotgun that was developed in the late 1970s. This weapon is very reliable and relatively popular. However, it is large, expensive, and contains very complex mechanisms. An ideal weapon for Close Quarters Combat.

	Threaded SPSA14	SPAS-12 (Threaded)	Shotgun	2.9	14.5	2.5	2.1	12x70, 12x76	?	?	?	4.76 kg	4,000 RU	A uniquely modified SPAS-12 shotgun, which has a threaded bore that greatly increases its accuracy when firing slugs or darts. However, it is large, expensive, and contains very complex mechanisms. An ideal weapon for Close Quarters Combat.
	Viper 5	H&K MP5A5	AR/td>	3.1	1.8	20.1	21.2	9x19 mm	30	200	0.31	2.86 kg	2,200 RU	One of the best weapons in the Submachine Gun class. During the last decades of the 20th century, it was adopted by armies and special forces units in many countries. When it was gradually replaced with more up-to-date models, it appeared on the black market and in the Zone.
	Noiseless Viper	H&K MP5A5	AR	5	1.8	20.1	21.2	9x19 mm	?	?	?	2.86 kg	2,200 RU	A H&K MP5A5 submachine gun fitted with a non-removeable silencer.
	Viper 5 9x18	H&K MP5A5 (9x18 mm)	AR	3.1	1.8	20.1	21.2	9x19 mm	?	?	?	2.86 kg	2,200 RU	A H&K MP5A5 submachine gun modified to utilize a more available round. A great, reliable submachine gun.
	Akm 74/2	AK-74	AR	9.5	2.8	10.9	11	5.45x39 mm	30	1000	0.35	3.62 kg	4,000 RU	A 1974 model assault rifle with a folding stock. Uses 5.45x39 mm ammunition. A simple and reliable weapon, but its production quality affects the gun's ergonomics and accuracy. The main weapon of choice for Stalkers and "lone wolves".
	Akm 74/2u	AK-74SU	AR	4.9	1.9	10.9	19.5	5.45x39 mm	30	200	0.32	3.02 kg	2,000 RU	The weight and size of the AK-74SU are similar to those of a Submachine Gun, but its mode of operation and the ammunition type it uses place it into the class of Assault Rifles. Its small dimensions are very useful when fighting inside a building or within a thick forest, and has relatively high piercing capabilities. Its main disadvantages are a limited accuracy range and quick overheating when firing bursts.
	Akm 74/2U ?	AK-74SU (Tactical)	AR	5	2	11	19.5	5.45x39 mm	?	?	?	3.02 kg	2,000 RU	An enhanced variant of the AK-74SU. Fitted with a non-removable silencer.
	Obokan	AN-94 Abakan	AR	10.9	3	10.9	10	5.45x39 mm	30	1000	0.36	4.22 kg	5,000 RU	The weapon of the elite troops in the Russian Army. Designed as a replacement for the outdated AK-74. The Abakan's receiver and barrel are movable, which helps decrease recoil and increase accuracy.
	Sniper Obokan	AN-94 Abakan (Sniper)	AR	10.9	3	10.9	10	5.45x39 mm	?	?	?	4.22 kg	5,000 RU	A modified AN-94 fitted with an optic sight for carrying out sniper fire. The optics embedded into the body of the weapon has a higher resolution than the standard model.
	Storming Obokan	AN-94 Abakan (Tactical)	AR	9.7	4	10.9	10	5.45x39 mm	?	?	?	4.22 kg	5,000 RU	A modified AN-94 fitted with an integrated granade launcher under the barrel, making it an even more versatile weapon.

	Tunder 5.45	Groza OC-14 (5.45 mm)	AR	7.9	8.1	17.8	18.5	5.45x39 mm	20	400	0.58	3.41 kg	20,000 RU	A Groza OC-14 with a modified barrel, which allows the rifle to utilize the more available 5.45mm round.
	FT200M	FN F2000	AR	13.5	8.9	23.9	17	5.56x45 mm	30	400	0.60	4.93 kg	34,000 RU	A modern bullpup assault rifle, equipped with an electronic fire control module and a 40-mm grenade launcher.
	SGI 5k	SIG SG-550	AR	13	6.5	15.1	5.5	5.56x45 mm	30	1000	0.48	4.33 kg	13,000 RU	A relatively new assault rifle utilizing the 5.56x45 mm SS109 round. This weapon is very popular due to its accuracy, soft recoil, and high reliability.
	Storming S IP	SIG SG-550 (Tactical)	AR	12	6.5	15.1	5.5	5.56x45 mm	?	?	?	2.53 kg	13,000 RU	A lightweight assault rifle geared for urban warfare. To lighten its weight, some parts were removed and/or replaced. As a result, there are no rails to attach a sight or a grenade launcher to the rifle.
	SGI 5k Sniper	SIG SG-550 (Sniper)	Sniper	12	6.5	15.1	5.5	5.56x45 mm	?	?	?	4.33 kg	13,000 RU	A SIG SG-550 modified for sniper fire. Fitted with a non-removeable optical sight.
	GP37	H&K G36	AR	14	7	24.1	18	5.56x45 mm	30	600	0.50	3.93 kg	36,000 RU	An assault rifle manufactured by Heckler and Koch in Germany. A first-grade specimen of modern weaponry: light, reliable, and ergonomic.
	IL 86	Enfield L85A2	AR	9.9	4	12.9	7.2	5.56x45 mm	30	800	0.40	5.33 kg	8,000 RU	After the British Army replaced this rifle with the H&K G36K, the L85 began appearing on the black market and the Zone in large quantities. The L85's main advantage is a standard 4X scope. Highly accurate, but decreases in Burst fire mode. Internal mechanisms, however, are not reliable and are prone to jamming.
	Balanced IL 86	Enfield L85A2 (Balanced)	AR	11.5	4	13	7.1	5.56x45 mm	?	?	?	3.33 kg	8,000 RU	A modified Enlight L85A2 with diminished recoil using weights.
	Lightened IL 86	Enfield L85A2	AR	9	4	13	7.1	5.56x45 mm	?	?	?	3.33 kg	8,000 RU	A modified Enlight L85A2 with an integrated silencer. Many parts were replaced with lighter components, making the weapon significantly lighter.
	TRs 301	ZM LR-300ML	AR	14	5.2	17.9	13.9	5.56x45 mm	30	400	0.44	3.03 kg	10,000 RU	A light rifle with an effective fire range of up to 300 meters. Great ergonomics and lightweight, this weapon is highly accurate. However, it is sensitive to dirt and is not ideal for difficult field conditions.
	Sniper TRs 301	ZM LR-300ML (Sniper)	Sniper	11.2	5.2	4	13.9	5.56x45 mm	?	?	?	3.03 kg	10,000 RU	A modified LR-300ML capable of firing single shots. Geared to be used as a cheap alternative to a sniper rifle.
	Vintar BC	VSS Vintorez	Sniper	17.8	10.1	10.9	17.1	9x39 mm	10	400	0.65	3.43 kg	24,000 RU	A special sniper rifle designed for silenced and suppressed sniper fire. Equipped with an integrated silencer and can pierce any bulletproof vest at a range of up to 400 meters. Highly valued by Stalkers of any level.

	Tunder S14	Groza OC-14	AR	8.5	8.1	17.8	18.5	9x39 mm	?	?	?	3.67 kg	20,000 RU	An assault rifle with an attached grenade launcher. An ideal assault rifle for Zone conditions: compact, reliable, versatile, and powerful. A favorite among Stalkers.
	VLA Special Assault Rifle	AS Val	AR	11.9	8.1	12.9	17.1	9x39 mm	20	400	0.58	2.97 kg	18,000 RU	This weapon is based on the VSS Vintorez sniper rifle. However, it has a folding stock, can fire in bursts, and has a larger magazine. Originally designed for special forces units operating in conditions demanding silenced and suppressed fire.
	Sniper VLA	AS Val Sniper	Sniper	11.9	8.1	12.9	17.1	9x39 mm	20	400	0.58	2.97 kg	18,000 RU	A modified AS Val rifle that allows the attachment of the PSO-1 optical sight.
	SVDm 2	Dragunov SVD	Sniper	12	17	0	2	7.62x54mm	10	1000	0.85	5.13 kg	30,000 RU	Widely used in all operations of the Soviet and Russian armies until 1960. Proved to be an exceptionally reliable and handy weapon. Sniper rifle of choice by the experienced Stalkers of the "Duty" faction.
	SVUmk2	Dragunov SVD Mk2	Sniper	15	17	2	0	7.62x54mm	10	1000	0.85	5.13 kg	30,000 RU	A modified Dragunov SVD sniper rifle with improved optics, allowing the user to zoom in further. The rifle's weight is balanced, resulting in decreased recoil.
	SVU ?	Dragunov SVU	Sniper	9	14.5	3.8	1	7.62x54mm	10	1000	0.80	4.63 kg	20,000 RU	An updated variant of the Dragunov SVD sniper rifle. A compact bullpup model, which is excellent for long treks into the Zone.
	Bulldog ?	RG-6	Grenade launcher	1	13	1.8	22	40 mm	6	100	0.75	6.68 kg	24,000 RU	A revolver-type 40 mm grenade launcher. An indispensable weapon, particularly when targeting large numbers of mutants, attacking well-guarded stationary objects, or fighting especially tough creatures.
	Bulldog 6	RG-6 (M209)	Grenade launcher	1	13	1.8	22	M209	6	100	?	6.68 kg	24,000 RU	A modified variant of the revolving grenade launcher, which is made to use M209 grenades.
	RPG-7u	RPG-7	Rocket Launcher	0	24	7	22	OG-7V warhead	1	400	3.00	7.30 kg	20,000 RU	A rocket-propelled grenade launcher, developed in the 1960s. RPGs are stored in large quantities in army depots, from where they are transferred to the Zone. Such weapons are rarely used by Stalkers: its huge dimensions and heavy weight make it unpopular, though it can be an indispensable weapon for certain missions.
	Gauss gun	Coil Gun	Science Fiction	21.5	24	0.5	13.1	2-mm Gauss	60	1000	1.10	6.00 kg	25,000 RU	A super-accurate weapon made by the scientists in the Zone. Gunfire is nearly inaudible, due to its use of energy obtained "Flash" artifacts instead of gunpowder. In spite of the Flash Rifle's tremendous firepower, the recoil is insignificant. The accuracy and power of this gun exceeds those of all other small arms.

Armor List

And here’s the Armor List. I am rather surprised that this info isn't shown to us by the trader...
The list is sorted by armor protection, but note that I have ignored special features.

View	Name	Weight	Cost	 Electric shock	 Impact	 Rupture	 Bulletproof cap	 Burn	 Radiation	 Chemical burn	 Explosion	Comments
	Leather jacket	3 kg	2,000 RU	+10%	+10%	+10%	+10%	+10%	+0%	+10%	+10%	An ordinary thick jacket, one of the many. It slightly increases bullet and splinter protection. It does not protect from anomalies and other affects.
	Skinner anomaly	3 kg	2,000 RU	+10%	+10%	+10%	+10%	+10%	+ 0%	+10%	+10%	They took this coat off the body of one of the stalkers who died in the anomaly 'fruit punch'. Having laid a long time in the anomaly, the coat obtained the ability to speed up metabolism.
	Bandit jacket	3 kg	6,000 RU	+10%	+10%	+15%	+15%	+10%	+ 0%	+10%	+10%	Traditional outfit of a bandit - a leather jacket with kevlar elements. Provides protection highly insufficient for the Zones severe conditions.
	Mail jacket	3 kg	6,000 RU	+10%	+10%	+15%	+28%	+10%	+ 0%	+10%	+10%	Common weak bandit body armor with mail plates sewn into its backing. Almost everybody can do it, but not everyone by far will have enough patience to.
	Merc suit	5 kg	12,000 RU	+30%	+20%	+30%	+20%	+30%	+30%	+20%	+25%	Stalker suit from the Merc faction. Its design is based on the suit used by the special forces of the Western armies. Due to a special treatment of the fabric , the armor has a strengthened stability during the physical movement of its plates. Its protective properties are slightly better than those of the PSZ-7 military bulletproof suits.
	Reinforced suit	5 kg	12,000 RU	+30%	+20%	+60%	+20%	+30%	+30%	+20%	+25%	There is chain mail sown into the lining of the coat, which raises the level of protection against fire arm attacks and monster bites. A PNV is also included in the set.
	Berill-5M armored suit	7 kg	24,000 RU	+30%	+20%	+40%	+45%	+30%	+30%	+30%	+40%	A Beryll-5M special forces suit modified for the Zone environment. It includes a PSZ-9a military bulletproof vest with beryllium coating and a Sphere-08 helmet. It is assigned for assault operations in areas with high background radiation. Its level of anomaly protection is low.

	Healing Beril	9 kg	24,000 RU	+30%	+20%	+40%	+45%	+30%	+30%	+30%	+40%	The fabric of the suit is saturated with a streptozoidal lotion, which speeds up the healing of wounds.
	Wind of Freedom suit	3 kg	20,000 RU	+50%	+50%	+30%	+30%	+30%	+50%	+50%	+25%	Light bstalker suit produced by gunsmiths of the freedom faction. It consists of a light military bulletproof vest with reinforcingn kevlar plates. It can protect from weak weapons. The fabric of the suit is treated with a special mixture which increases anomaly activity resistance.
	Stalker suit	5 kg	30,000 RU	+50%	+50%	+40%	+30%	+50%	+50%	+50%	+30%	Stalker suit manufactured by 'folk craftsmen'. It is an effective combination of a light military bulletproof vest and a rubberized fabric suit. It is reinforced with inserted kevlar plates and provides good protection from weak gunfire. All in all it is highly inefficient for carrying out deep raids and serious operations in the knots of the Zone.
	Tourist suit	5 kg	36,000 RU	+50%	+50%	+40%	+30%	+50%	+50%	+50%	+30%	The former owner of this thing was a real tourist and, it seems, often went on very difficult, on the verge of human endurance, hiking trips. He know how to distribute correctly the weight that he carried, and which things to give preference to. The coat pockets and the educated choice of the backpack allow its owner to carry a heavy weight.
	Ghost Suit	5 kg	30,000 RU	+50%	+50%	+40%	+30%	+50%	+50%	+50%	+30%	Rumor has it that the ghost stalker never carries a first aid kit with him. Everything heals on him like on a dog. They say that he has an unusual suit that he got on an anomaly.
	Kombez Freedom M2	3 kg	20,000 RU	+90%	+50%	+30%	+30%	+30%	+50%	+50%	+25%	Metal wire mesh is integrated into the suit for protection from electric and magnetic fields. The set also includes an instrument for night vision
	Monolith suit	5 kg	20,000 RU	+60%	+50%	+40%	+40%	+50%	+50%	+40%	+50%	Stalker suit from the Monolith faction. The producer is unknown. Its protective properties are slightly worse than those of the PSZ-9a military bulletproof vest. Its structure is similar to the suit popular with neutral stalkers which combines a bulletproof vest and a radiation protection suit. It provides good protection of gunfire. Its level of anomaly protection is low due to the absence of an air filtering syste.

	PSZ-9d Duty Armor	5 kg	28,000 RU	+50%	+50%	+50%	+50%	+50%	+50%	+50%	+40%	Produced by one of Kiev's defence research institutes and commissioned by the Duty faction. It is as simple and reliable as the standard PSZ-9 model, but due to the new materials, it provides good protection from various harmful impacts, including firearm damage. The vest still needs some work because it has no breathing protection system.
	Hunter PSZ-9d	5 kg	28,000 RU	+50%	+50%	+70%	+40%	+50%	+50%	+50%	+40%	Duty armor suit with enhanced parameters of protection against bites and cuts.
	Guardian of Freedom suit	6 kg	25,000 RU	+50%	+60%	+50%	+40%	+50%	+50%	+50%	+45%	Reinforced stalker suit produced by the gunsmiths of the Freedom faction. It is made up of a medium military bulletproof vest plated with reinforced zirconium elements which provide good protection from rifle bullets and splinters from medium and long range. The material of the suit consists of two layers: specially treated leather and fabric with asbestos yarn. The suit provides good protection from radiation and various weak anomalies.
	Exoskeleton	15 kg	100,000 RU	+50%	+90%	+80%	+60%	+50%	+30%	+50%	+80%	A military exoskeleton prototype. It never went into serial production, because of extreme cost and some design flaws. It is however produced in small batches in illegal factories outside of Ukraine. This is a third generation exoskeleton. The design defects which used to decrease its mobility were eliminated and the armor was reinforced. It provides excellent bullet and splinter protection. It has a low level of anomaly protection.
	Exoskeleton PNB-4UZ	15 kg	100,000 RU	+50%	+90%	+80%	+60%	+50%	+30%	+50%	+80%	Basic device for night vision is replaced by a more modern model with a digital filtration of the signal sent.
	SSP-99 Ecologist	4 kg	30,000 RU	+90%	+50%	+15%	+20%	+90%	+90%	+90%	+40%	A SSP-99 chemical protection suit specially designed for the Zone conditions. It is used by scientific expeditions and the eco-stalkers who cooperate with them. It has an integrated air-filtering and air-conditioning system. It is heat and electricity resistant, provides good protection from radiation and biological anomalies. It is resistant to chemically aggressive environments. It is not designed for combat, so it provides neither bullet nor splinter protection.
	SEVA suit	9 kg	60,000 RU	+90%	+50%	+50%	+40%	+80%	+90%	+70%	+50%	This suit was produced by one of Kiev's defense research institutes and represents an excellent alternative to stalker hand-made suits. It is an excellent combination of a bulletproof vest, a closed cycle breathing system and an integrated system of anomalous field suppression. Due to the perfect choice of the materials, it is a good choice. The only disadvantage is its price.

	PSZ-9Md Universal Protection	9 kg	50,000 RU	+90%	+50%	+50%	+40%	+80%	+90%	+70%	+50%	A wonderful protective suit for the Zone. Stalkers appreciate it because it combines excellent anomaly-proof and bullet-proof qualities. It includes the PSZ-9d suit, a closed cycle breathing system and an integrated system of anomalous field supression. It provides quality bullet and splinter protection.
	Military armored suit	12 kg	80,000 RU	+70%	+80%	+70%	+55%	+60%	+70%	+50%	+70%	This Skat-9M bulletproof military suit is designed for assault operations in areas of anomalous activity. It includes a PSZ-12p heavy military bulletproof suit, an integrated compensation suit and a Sphere 12-M helmet. It provides perfect protection from bullets and splinters and it doesn't decrease the soldiers mobility. It has a balanced system of anomaly protection.
	SSP-99M Suit	7 kg	48,000 RU	+90%	+50%	+50%	+40%	+90%	+90%	+90%	+60%	High quality modified SSP-99 suit. It provides increased body protection from bullet and splinter damage. It is designed for the guards working with scientific expeditions. It provides good protection from radiation and biological anomalies. It is resistant to chemically aggressive environments and other effects dangerous to the body.
